Summary

Starting work from the age of 8 to help my family gave me a strong work ethic out of unfortunate circumstances. Now that I have developed this ethic, I'm a highly motivated problem solving individual looking for part time work in the web development space.

Experience

Electrician Apprentice

I.B.E.W. Local 98 • Philadelphia, PA

04/2021 - Present

I use my easily adaptable skills to work safely and efficiently on electrical projects spanning from wall outlets to 15000V+ panels.

- Inspect and troubleshoot electrical issues
- Working in a major hospital in the Central Philadelphia area, which necessitates pristine cleanliness, and no mishaps or faults of any kind.
- The union is providing me with world class knowledge of a wide variety of aspects, from electric vehicle engineering, to fire alarm and nurse call production.

Political Organizer

I.B.E.W. Local 98 • Philadelphia, PA

06/2019 - 04/2021

While waiting for the process to get into my current apprenticeship, the union offered work in the political field. Setting up events, manning picket lines, collaborating with the heads of the union, all of these things gave me a grasp of marketing, micro-systemic politics, and people skills.

Code Projects

- Github: github.com/Orbit001
- Portfolio: orbit001.github.io/Portfolio/
- LinkedIn: www.linkedin.com/in/paul-m-0a306313b/

Password Generator:

Upon ingesting user input, generates a string of random characters based off specific criteria.

HTML/CSS/JS.

github.com/Orbit001/P-Word-Generator

Weather Reporting Site:

Using multiple APIs, takes users input of any city and provides current weather as long as a 5 day forecast.

HTML/CSS/JS/OneCallWeatherAPI

github.com/Orbit001/Weather-Reporting-Site

Super Eats:

A team and skill building project to use apis and make a visually appealing, yet problem solving application. Using well optimized JS a user can easily order food from a fictional restaraunt.

HTML/CSS/JS/APIs
